

fresh produce packers and distributors

Packaged produce is changing the way consumers shop for fresh fruits and vegetables. Paper Pak Industries has been an integral part of this growing market trend, supplying absorbent solutions to produce packers and distributors for a variety of value-added fresh fruits and vegetables, including packaged raspberries, tomatoes, asparagus, and cut fruit.

The leading fresh produce packers and distributors appreciate the many benefits provided by Paper Pak Industries' products and services:

Pads Preserve Quality

Absorbent pads readily absorb moisture and condensation so packaged fruits and vegetables remain dry during packing, refrigeration, transport, and on display.

A Sense of Confidence

Consumers are enthusiastically purchasing a wide variety of packaged produce that extend freshness, add convenience, save shopping time and ensure consistent quality. Our products enable produce marketers to improve consumer satisfaction by enhancing the shelf appeal of a wide range of packaged produce.

Custom Design Capabilities

In addition to offering a comprehensive line of floor-stock products, we also have the ability to custom design and manufacture absorbent products specifically tailored to the unique packaging needs of the produce industry.

Diverse Customer Solutions

Whether you pack your produce in corrugated containers, clamshells or individual foam trays, PPI's absorbent products ensure your packaged fresh fruits and vegetables maintain their fresh appeal.

Responsive and Flexible

Our tradition of flexibility is central to our continued success. Paper Pak Industries is very responsive to individual customer needs, including dedicated sales and technical support.

Absorbent Specialists

We are the largest manufacturer in North America dedicated solely to the production of absorbent mediums for the food packaging industry.

absorbent products for produce packers and distributors

Consumers Value the Quality and
Convenience of Packaged Produce

At Paper Pak Industries, we specialize in making absorbent food pads that protect quality and preserve in-store freshness. We ensure your packaged fresh fruits and vegetables will maintain their appeal to consumers at point of purchase.

A Pad for Every Package

Paper Pak Industries' comprehensive line of absorbent food pads is available in a variety of sizes, colors, shapes and absorbencies for specific products and package sizes. We offer a variety of pad options that give produce packers and distributors a multitude of choices when selecting the appropriate pad for your fresh products.

Absorbent Food Pads Make A Difference

Superior Fluid Containment: Superior performance in trapping free-flowing natural juices, including eliminating juice crossover in fruit medley packages.

Fresh Appearance: Packaged fresh fruits and vegetables maintain a fresher, cleaner appearance longer.

Consumer Confidence: Drier packages reinforce consumer confidence in the quality of your products.

Strength Integrity: A unique pad construction using high crepe cellulose either with or without sealed sides eliminates any tearing or separating, even under pressure.

Our Patented Technology Delivers Quality

- Drier, fresher packages of fresh fruits and vegetables.
- A highly absorbent, strong cellulose core which locks in moisture.
- Top and bottom polymer based layers that more effectively retain juices and provide exceptional strength.
- No fluff particles to burst out when the pad is wet.
- A patented sealing process that prevents the pad from delaminating.
- Optional sealing on all four sides for superior performance.
